# ABOUT US

Crypto forex trading is using cryptocurrency when trading currency pairs to benefit from the cryptocurrency's price movements as well as the exchange rate between two fiat currencies. Yes, crypto trading is legal in the U.S.A., but it is regulated by agencies like the SEC and CFTC. Exchanges must comply with anti-money laundering (AML) and know-your-customer (KYC) laws. Some states have additional regulations. The IRS considers cryptocurrency taxable.

# What is Crypto Trading

Crypto trading involves buying and selling cryptocurrencies on an exchange, either to speculate on price movements or to directly own the coins. It's a decentralized market, meaning it's not controlled by a central authority, and relies on a network of computers (blockchain). Some crypto trading platforms claim to be registered businesses, but this isn't the same as being registered with a securities regulator. Crypto assets are risky investments because their value may rise and fall suddenly and significantly. These changes in value are hard to predict. Cryptocurrency, or crypto, is virtual or digital assets purchased with real money (\$, £) traded on blockchain technology. It does not have all the values of real or fiat currencies.

# What is Forex Trading

Forex trading, also known as foreign exchange or FX trading, is the buying and selling of one currency for another, aiming to profit from fluctuations in currency exchange rates. It's the world's largest and most liquid financial market. Forex trading, also known as foreign exchange or FX trading, is the conversion of one currency into another. FX is one of the most actively traded markets in the world, with individuals, companies and banks carrying out around \$6.6 trillion worth of forex transactions every single day.
